Mini Digital Height Gauge - Wood Working - WHG-3U

0-80mm

Ideal for Saw Blades & Routers

ORDER CODE:	W644
MODEL:	WHG-3U
Measuring Capacity (mm):	80

Description

The perfect addition to your wood working machine setup kit. The economically priced digital gauge can be used to set the depth of cut on table saws, and routers. As this gauge can also be used horizontally with the assistance of the magnetic base, it can also be used to set the fence position to the cutter. Measurements in metric, imperial and fractional inches are displayed on a large LCD screen easily changed by the touch of button. The gauge can be set to zero at any place along the slide.

Features

- Horizontal and vertical measuring capable
- Digital reading in metric, inches and fractions
- Hole depth measuring 50.8mm
- 0 - 80mm measuring range
- 60mm wide aperture
- Self standing for setting cutter depth on routers tables and low profile for back fence adjustment
- Measuring rule with metric/imperial scale and locking screw
- Digital display for easy reading with readout accuracy to 0.1mm
- Magnetic base help when used horizontally
- Auto shut-off in 3 minutes
- Includes CR2032 3V Lithium battery
