Description

The VIPER CUT 30 Mk II comes with a CNC connection, so you can plug in a CNC torch and use it with a CNC table. It is one of the most powerful cutters for its size. Running at just 30A, this machine still has the capability to produce a 12mm clean cut and a 14mm severance.

Get unrivalled performance across every kind of metal. Whether you're working on solid mild steel or trying out the new perforated cutting mode on materials like mesh and grating, the VIPER CUT 30 Mk II can do it all.

Take this machine with you wherever you go. With a 10AMP power plug, you can plug and go with any domestic outlet. Its versatility makes it perfect for at-home use and on job sites.

Pilot Arc Start lets you start the arc before contacting the work piece. This gives you better control of the torch, especially on materials with uneven or curved surfaces.
