Description

Despite its small size, the Powermax30® AIR delivers big performance. The smallest, lightest handheld plasma cutting system in its class, it includes its own built-in air compressor, so you can use the Powermax30 AIR anywhere there’s single-phase power. Just plug it in, attach the work clamp and you’re ready to cut.

Features

- Internal compressor eliminates the need for an external air compressor and filter
- Just one tool is all you need to cut a variety of metal types and thicknesses
- Small size and light weight let you take the Powermax30 AIR to the work, rather than bringing the work to the system – an ideal solution for a wide range of cutting applications
- 240 V power with Auto-Voltage™ technology.
- Do more in less time. Fast cutting speeds and superior cut quality result in less secondary operations.
- Quickly cut metal grate or rusted metal without retriggering with the continuous pilot arc feature.
- New AIR T30 torch is rugged and designed to withstand the toughest environments.
- Hypertherm Certified™ reliability ensures performance in the most demanding environments

- Warranty: Power supplies have a 3-year warranty and torches a 1-year warranty
