ORDER CODE:	K8110
NSW DOE Item No.:	5
QLD DOE Item No.:	-
MODEL:	Schools / TAFE DC-3/FC-10
Filter Bag (Micron):	1
Air Flow (CFM):	1200
Inlets / Diameter (No. / mm):	2 x Ø100
Noise Level (dB):	-
Motor Power (kW / hp):	1.5 / 2
Voltage (V):	240
Nett Weight (kg):	51

Description

A powerful and cost-effective dust extractor with a pleated filter cartridge, designed for serious workshop use. Powered by a robust 2HP, 240 volt motor and 300mm impeller, the DC-3 delivers up to 1200CFM of airflow, providing reliable performance across a wide range of woodworking applications.

The unit includes a single 125mm (5") outlet and a twin 100mm (4") Y-piece for flexible connection options. It works equally well when connected to one high-volume machine — such as a planer or heavy-duty router — or two moderate dust-producing machines like a table saw, bandsaw, sander, or lathe.

The pleated filter cartridge captures particles as fine as 1 micron, helping protect your health from harmful dust. Cleaning is quick and efficient thanks to the built-in agitator — simply turn the handle to dislodge dust and shake it down into the collection bag.

Features

- 1.5kW (2HP) 240V motor
- Airflow up to 1200cfm
- Portable on wheels
- 125mm (5") single or twin 100mm(4") inlets
- Quick-action lower bag clamp
- 1 micron pleated filter cartridge, filtering surface area up to seven times greater than a standard bag
- Rotary handwheel for manual cleaning the filter

Includes

- 3m of 100mm (4") hose (W3981)
- 2 x 100mm (4") clamps (W340)
- 10 plastic collection bags
