15A PLUG 240V

Description

This powerful, professional STICK (MMA) welding machine is built for both the worksite and workshop. It's loaded with advanced features like hot start, arc force, and anti-stick for optimal performance. Plus, its DC Lift Arc TIG capability adds versatility to tackle a variety of welding tasks.

HD Backlit Interface
This next generation interface panel is bright and easy to read in any environment.

10A Plug
A 10 AMP power plug can be used on any domestic outlet. It's perfect for the DIY home handyman or the professional welder looking for a machine that can be used almost anywhere.

DC Lift Arc TIG
Lift Arc ignition allows the arc to be started easily in DC TIG by simply touching the tungsten to the workpiece and lifting it up to start the arc. This stops the tungsten tip sticking to the workpiece and breaking the tip from the tungsten electrode.

Smart Fan
Smart Fan diminishes noise, saves power, helps reduce energy costs, and minimises the number of contaminants being pulled through the machine.

Advanced MMA Features
This machine features Anti-Stick technology, as well as adjustable Arc Force and Hot Start functionality. These features are designed for improving weld quality and ease of use.

Generator Compatible
Going off the grid? The RAZOR ARC 140 can be connected to a generator, we recommend one with an 8kVA rating.

Lightweight & Portable
Weighing just 5.5kg, the RAZOR ARC 140 is ready to go anywhere you need it.
