Description

This powerful, professional STICK (MMA) welding machine is built for both the worksite and workshop. It's loaded with advanced features like hot start, arc force, and anti-stick for optimal performance. Plus, its DC Lift Arc TIG capability adds versatility to tackle a variety of welding tasks.

HD Backlit Interface

This next generation interface panel is bright and easy to read in any environment.

DC Lift Arc TIG

Lift Arc ignition allows the arc to be started easily in DC TIG by simply touching the tungsten to the workpiece and lifting it up to start the arc. This stops the tungsten tip sticking to the workpiece and breaking the tip from the tungsten electrode.

Smart Fan

Smart Fan diminishes noise, saves power, helps reduce energy costs, and minimises the number of contaminants being pulled through the machine.

Advanced MMA Features

The RAZOR ARC 180 features Anti-Stick technology, as well as adjustable Arc Force and Hot Start functionality. These features are designed for improving weld quality and ease of use.

Generator Compatible

Going off the grid? The RAZOR ARC 180 can be connected to a generator, we recommend one with an 10kVA rating.

Lightweight & Portable

Weighing just 5.8kg, the RAZOR ARC 180 is ready to go anywhere you need it.
