Description

We for many years have been working in close consultation with the education departments to ensure the most suitable equipment is provided to our schools and TAFE, not only does it comply with the departments stringent safety requirements but is built to last the distance. That's why we consider our company to be a specialist when it comes to supplying quality Wood Work and Metal Working Machinery for Public or Private Schools, TAFE Colleges and Trade Training Centres in all states of Australia.

The TECNA hand held spot welders are light weight, reliable and simple to operate units for the smash repair and sheet metal fabrication industries. There are a variety of arms available for both the units enabling a range of applications. The 7020 has the added advantage of coming standard with a timer, a compensation circuit starts the timer only when there is a proper range of current, which allows welding on oxidised sheets or materials with painted surface.
