2400 x 1200mm M16 Pro Series Welding Table - WT16-2412N

Plasma Nitriding Coating

Ø16mm Holes

Please Call

ORDER CODE:	K8867
MODEL:	WT16-2412N
Type:	~
Table Hole Diameter (Ø):	16
Table Top Size (mm):	2400 x 1200
Table Height with Stand (mm):	~
Table Side Height (mm):	100
Top Plate Thickness (mm):	12
Grid Pattern (mm):	50 x 50 / Standard
Table Slots (mm):	~
Table Load Capacity (kg):	~
Nett Weight (kg):	431

METALMASTER

Description

When accuracy, strength and reliability matter, the Metalmaster M16 Pro Series Welding Table delivers uncompromising performance for professional fabricators. Manufactured from heavy-duty S355 steel and engineered with advanced CNC machining technology, the Pro Series provides an exceptionally flat, durable and versatile work surface designed to maximise productivity on every project. Every table begins with a fully welded, interlocking rib construction that creates an incredibly rigid foundation capable of handling demanding fabrication work. The tabletop and sides are CNC machined to a finished 12mm thickness, achieving an outstanding flatness tolerance of $\pm 0.1\text{mm}$ over 1m^2 for precision assembly and welding.

Precision doesn't stop at the surface. Each Ø16mm fixture hole is CNC bored to an exact tolerance of $\pm 0.05\text{mm}$, ensuring perfect compatibility with professional fixturing systems. The newly radiused hole edges allow fixtures and clamps to slide into place smoothly, making setup faster, easier and more efficient.

The industry-standard 50 x 50mm hole pattern provides closely spaced clamping points for precise positioning and versatile fixturing. Precision-engraved 50mm grid lines and a perimeter ruler allow accurate positioning, helping reduce errors while increasing productivity.

To ensure years of dependable service, every M16 Pro Series table receives a plasma nitriding treatment that thermochemically hardens the surface. This premium finish dramatically improves resistance to weld spatter, wear and corrosion while maintaining the precision-machined surface.

Designed for serious fabrication environments, the Pro Series features 100mm high reinforced sides, interlocking solid steel ribs and adjustable heavy-duty legs fitted with 125mm lockable swivel castors, providing outstanding stability with the flexibility to move your workstation wherever it's needed.

Complete your setup with Metalmaster's extensive range of Pro Series clamps, stops and fixturing accessories to create the ultimate modular welding system. Whether you're fabricating one-off custom work or tackling large production jobs, the M16 Pro Series gives you the precision, durability and versatility to take on every project with confidence.

Features

- Heavy-duty 12mm S355 steel tabletop and sides
- Precision CNC machined to $\pm 0.1\text{mm}$ flatness over 1m^2
- Ø16mm precision-bored fixture holes with $\pm 0.05\text{mm}$ accuracy
- Radiused holes for smoother fixture and clamp insertion
- Industry-standard 50 x 50mm standard hole pattern
- Precision engraved 50mm grid lines and perimeter ruler
- Plasma nitrided surface for superior hardness, rust, wear and spatter resistance

Product Brochure For K8867

- Reinforced interlocking rib construction for maximum rigidity
- 100mm high sidewalls for exceptional load capacity
- Adjustable heavy-duty legs with lockable 125mm swivel castors

Includes

- 6pcs of adjustable heavy steel legs c/w swivel caster with brake
- 52pc Pro Series Welding Table Clamp Kit WT16-KIT52 (W07814)
- Welding Curtain (W225)
- Magnetic TIG Torch Rest - TTH-1 (W10361)
- Magnetic MIG Torch Rest - MTH-1 (W10362)

Optional Accessories

- It is recommended that a minimum of 2 pairs (4pcs) of the WT16-LFK2 - Table & Accessory Lifting Kit (W07820) when lifting

Specific Features

Adjustable Table Height 665 900mm

Plasma Nitriding Surface Finish

Radius Edge Holes

16mm Diameter Holes

Standard Grid Pattern

Perimeter Ruler Engravings

100mm High Sides

Approx 12mm Thick

Swivel Brake Wheels
