Product Brochure For L405

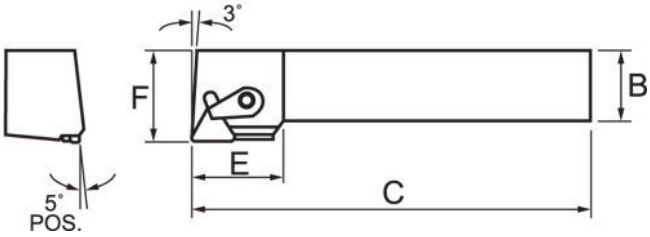

Left Hand Turning Tool Holder - CTGPL-1616-H11

16mm Tool Height
Insert tip not included

ORDER CODE:	L405
Part Number - Style:	CTGP
Tool Height Size (mm):	16
Clamping Method of Insert:	~
Category:	~
Connection style:	~
Back End Size:	~
Application:	~
Hand Type:	Left
Holder Style:	~
Clearance Angle:	~
Insert Type:	TPMR11
A (H) (mm):	16
B (mm):	16
C (LF) (mm):	100
LH (mm):	~
F (WF) (mm):	20
E (mm):	20

Made in Taiwan

Description

Quality Tipped Tool Holders ISO Standard to suit Tungsten Carbide Indexable Insert Tips.

NOTE: Inserts not included with tool holders

Use insert TPMR 110304 (L061)

Features

- Positive rake turning tool holder with 90º approach angle
- Suitable for heavy duty cutting
- Left hand tool holder suitable for facing operations

SETTING THE SPINDLE SPEED

To calculate the correct speed the following metric formula can be used

$$RPM = \frac{1000 \times \text{Surface speed in Metres per Minute}}{3.14 \times \text{Diameter in millimetres}}$$

Approximate surface speeds for carbide tools	Metres per minute	
Material	**Roughing**	**Finishing**
Mild Steel	50	80
Cast Iron	40	60
Aluminium	80	100
Stainless Steel	40	50

Example 1.
20mm Mild Steel bar to be rough machined

$$RPM = \frac{1000 \times 50}{3.14 \times 20mm} = \frac{50000}{62.8} = 796rpm$$

Example 2.
20mm Mild Steel bar to be finished machined

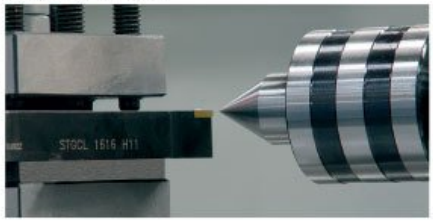

$$RPM = \frac{1000 \times 80}{3.14 \times 20mm} = \frac{80000}{62.8} = 1273rpm$$

- Set the spindle speed to the closest speed to the RPM calculated
- If in doubt then set a speed slower than the calculated speed

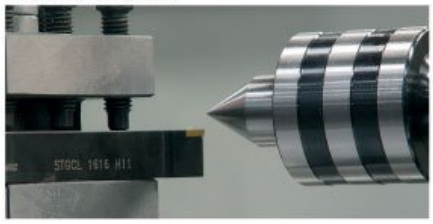

SETTING THE TOOL ON CENTRE

For the tool to cut correctly it needs to be set on centre. This can be best achieved by placing a centre in the tailstock and packing the tool until the tool is on centre.

Correct centre height

Incorrect centre height
