Maximum tube weight:	~
Tube loading length range:	~
Maximum load capacity of storage bin:	~
Weight:	80 up 500
Dimension:	800 up to 2500

Description

Flexible Loading
K-Loader easily loads small tubes with diameters from 20mm to 120mm. Its wide loading material range includes square tubes, round tubes, rectangular tubes, angle steel, channel steel, etc.

Automatic Loading
K-Loader automatically detects tubes and clamps the next tube to the standby place. After the processing for the previous tube finishes, the device loads the next tube in time and achieves constant processing in a real sense.

Intelligent Operation
Intelligent functions, like one-click preset, warning for lack of tubes, adding tubes when processing, anti-scratch for tubes, are available with clear and convenient access on the controlling interface.

Note:
