Rust & Corrosion Preventive - FLUID FILM Aerosol

333 Grams Aerosol Spray Can Type

On Sale

	Ex GST	Inc GST
	~~$27.00~~	~~$29.70~~
	$22.73	$25.00

ORDER CODE:	O040
Type:	Spray Can
Size:	333 gram

Description

FLUID FILM - RUST & CORROSION PREVENTIVE PENETRANT & LUBRICATION

Fluid Film® is a lanolin based rust/corrosion preventive and lubricant that provides long term protection and lubrication for all metal surfaces. Fluid Film® locks out and displaces moisture while lubricating moving parts for extended periods of time. It will not be readily washed off with water, but creates a barrier of protection that continues to work even in the most corrosive of environments. Fluid Film® is the worldwide standard for corrosion protection and lubrication.

Fluid Film products offer powerful corrosion protection for all metals and superior lubrication for all moving parts. They are long lasting, thixotropic liquids and gels that have been used for over 55 years in the highly corrosive marine environment of ships and offshore drilling rigs. More recently they have been introduced and successfully utilized in the lawn & garden, aviation and automobile industries, as well as providing an eco friendly solution for home maintenance. Facilities where they are used include government, commercial fishing, gas companies, farming, salt, power, and industrial plants.

Fluid Film is formulated from specially processed wool-wax, highly refined petroleum oils and selected agents to provide corrosion control, penetration, metal wetting and water displacement. These long lasting products contain no solvents, will not dry out and will penetrate to the base of all metals, providing corrosion protection from both natural and industrial atmospheres. Heavily corroded and/or frozen parts such as nuts, bolts, shafts, etc. that would normally be damaged during maintenance, can be salvaged by applying Fluid Film.

ENVIRONMENT
- Fluid Film products are solvent free and consist of an all natural lanolin base, which contain less than 1% VOC in their bulk form.
- Remaining solvent free since the original formulation in 1943, the Fluid Film product line is made of the highest quality corrosion preventives and lubricants available on the market today.
- Fluid Film, when used on cutting devices, will not burn greenery.

Features

- 333 grams
- Environmentally friendly
- Applicators & Transfer Pumps handling Liquid Fertilizer
- Augers
- Balers
- Battery Terminals
- Bin Slides
- Blades/Cutters
- Cab Door Hinges
