Description

SmartSYNC™ Cartridge Reader

The Hypertherm cartridge reader works with the Powermax SYNC™ cartridge reader app to provide a simple process for reviewing data stored in Hypertherm cartridges. The cartridge reader fits into the cartridge and works with the near-field communication (NFC) antenna of your mobile device to transfer data stored in the cartridge into the app. Data in the app can then be imported into the cartridge excel data analysis tool, or a customer created tool, to analyze performance for starts, transfers, arc-on time, and other valuable cartridge data.
