ARCDROID

Description

Plug-and-Play Upgrade to any ArcDroid

The ArcDroid PLUS 10" Touchscreen is a direct replacement for the standard ArcDroid Simple Trace controller. Same connector. Same mounting pattern. Unplug the old one, plug in the new one, and you're cutting.

Just update your ArcDroid software to the latest version (free via download to USB), swap controllers, and you're cutting. If you own an ArcDroid — any generation, any year — the PLUS works with it.

Features

- 10" 720×1280 HD capacitive touchscreen
- 8x memory capacity to handle complex DXF files
- On-Screen text with 3 stencil-ready fonts, on-controller layout
- Shape library with 12 parametric templates (tabs, flanges, gussets...)
- Patterning with full X/Y arrays
- Run from here function you can resume or re-cut any shape mid-program
- Standalone mode you can add a mouse and USB-C power = desktop design station
- Tracing of lines & arcs, tangent arcs, splines with 8x complexity
- Tactile scroll wheel (jog/confirm) along with 3 contextual function buttons
- Robust Die-cast aluminum housing with steel faceplate and rubber bumpers
- 100 x 100 VESA Mount on rear of housing
- Updates free downloadable via USB for new fonts, shapes and features
