Skew Chisel (Standard) - HSS Wood Turning Tool - CH300

12.7mm (1/2")

ORDER CODE:	R8140
MODEL:	CH300
Set Type:	Skew Chisel (Standard)
Number of Pieces (No.):	1
Chisel Size & Type:	12.7mm (1/2")

Description

Record Power CH300 Skew Chisel (Standard) - HSS Wood Turning Tool

(HSS) High Speed Steel material composite is W6Mo5Cr4V2, consisting of Tungsten, Vanadium, Molybdenum, Chromium, Sulfur, Phosphorus, Manganese, Silicon & Carbon. These HSS tools have a very high resistance to wear & softening at high temperatures whilst maintaining a good toughness on the cutting edge, that's very crucial in a good quality turning tool as it keeps its edge sharper than normal carbon steel by a ratio of ten to one.

Durable Material - The handles are made from Beech with an attractive Rosewood stain. This close grained hardwood gives the necessary weight, strength and durability that a good quality tool needs.

Tangs - The handle tangs are long, strong and fully inserted in to the chisel handles.

Handle Shape - The handles are shaped to encourage holding near the bottom to give the best control. Ergonomically designed in consultation with professional turners.

Handle Length There are 2 sizes - 9" for chisels, requiring fine control (e.g Spindle Gouges and Skews) and 16" handles for smooth sweeping cuts (e.g Bowl Gouges).

Strong Ferrules To give superior support to the blade in the handle, the walls of the brass ferrules are extra thick and the ferrule is pinned to the handle rather than the less secure crimping method.

Features

- The main use of this tool is the planing of spindles to produce a silky smooth finish and skilled use can reduce or even eliminate the need for sanding. It can also be used for creating beads and valleys on spindles and is a versatile essential in any turner's toolkit.
