Description

Record Power CWA76 faceplates are the ideal tool for mounting larger or heavier work, for turning across the grain. This steel faceplate is precision machined on external faces to a high tolerance and CNC turned for exceptional accuracy and balance. It features concentric circular grooves to aid the centralising of smaller workpieces. A rough guide to a faceplate's capacity is that pieces can be turned up to three times the diameter of the faceplate they are mounted on.
