Hand Lever Guillotine - HS-32

800 x 1.2mm Capacity
Includes Pedestal Stand

On Sale

	Ex GST	Inc GST
	~~$420.00~~	~~$462.00~~
	$386.36	$425.00

ORDER CODE:	S1885
MODEL:	HS-32
Blade Length (mm):	810
Full Length Maximum Capacity - Mild Steel (mm):	1.2
Plate - Mild Steel (mm):	~
Round - Mild Steel (mm):	~
Angle - Mild Steel (mm):	~
Cut Length - with 1.2mm thickness (mm):	800
Nett Weight (kg):	55

Description

The HS-32 HAFCO METALMASTER Hand Lever guillotine is a versatile and user-friendly shear designed for cutting various sheet metals and plastics with precision. Its extended handle maximizes leverage, allowing it to effortlessly slice through materials up to 1.2mm thick. Constructed with tempered tool steel, the cutting blades provide a substantial cut length of 800mm, making this tool ideal for professional environments such as construction sites, workshops, and factories, as well as for personal DIY projects.

Featuring a large blade, this guillotine enables users to cut materials up to 800mm in length in a single stroke. The tempered tool-steel edges ensure clean and accurate cuts through sheet metal or plastic, enhancing cutting efficiency. The results consistently yield precise and smooth surfaces, meeting the expectations of users.

The guillotine is designed for ease of use, with an extra-long handle that facilitates cutting through thicker or tougher materials with minimal effort. A safety spring mechanism automatically returns the lever to its original position after each cut, providing convenience during repetitive tasks.

Included with the guillotine is a robust base frame that keeps the tool stable and ready for use in any workshop. The frame features mounting holes for securing the guillotine to the floor, enhancing stability, while additional side holes allow for mobile mounting without the frame.

Built with high-quality materials and a durable, abrasion-resistant steel blade, the HS-32 manual shear is distinguished by its long service life and the ability to produce precise cut edges, even with regular use.

Features

- "NO BULL CAPACITY" - Australian Tested & Rated To True Working Capacity
- Sheet metal up to 1.2mm
- 800mm long shearing length
- 765mm material cutting height
- Spring assisted top blade return
- Hardened tool steel blades
