METALMASTER

Description

These English Wheel lower anvils are made from MC Nylon with a shore scale hardness of D84, slightly harder than a bowling ball, to allow you to form the material rather than stretching it when using standard steel anvils plus with the added benefit of having a non-marking finish they are perfect when shaping aluminium or material requiring a mirror finish eg. Stainless Steel. Anvils are reversible to suit your application.

Features

- Anvils are reversible to suit your application
