METALMASTER

Description

Bowl dollies are used to form curves by hammering the metal with a hammer or slapper over the rounded part of the dolly. These dollies are smoothly finished to prevent damaging the material you are forming.

They're the same specialty domed dollies auto body shops and fabricators use to form and shape sheetmetal curves.

Features

- Bowl Dome Dolly Section Size:
- Ø150 (50 x 8 x 150mm Handle)
- Polished forming surfaces for consistent, smooth forming
