Industrial Sandblasting Cabinet - SB-375

Inside Cabinet 940 x 600 x 340-580mm (L x W x H)
Includes Internal LED Light & Vacuum Filtration System

ORDER CODE:	S300
MODEL:	SB-375
Approx. Inside Cabinet Size (L x W x H) (mm):	940 x 600 x 340-580
Internal Light (Type):	LED Light
Recommended (FAD) @ 80psi (CFM / Lpm):	13 CFM (368 L/min)
Floor Space with Door/Lid Open (L x W x H) (mm):	2070 x 970 x 1650
Nett Weight (kg):	105

Description

The SB-375 is well known for a heavy duty quality build for a workshop sandblasting cabinet that features a large tempered glass viewing screen and powerful internal LED light to brighten up the work area inside the cabinet. It has two side access doors fitted and are sealed all way round the door perimeter, and for additional protection, it also has a safety interlock on each side door that prevents the machine to operate whilst any of the two side access doors have been accidently left open.

At the rear of the machine there is a built in vacuum system that's connected to the cabinet to extract fine dust and airborne particles from the cabinet whilst blasting so you always have clear vision at your item. There are two option for blasting with this unit, the first option is using the conventional blast gun with flexible hose to maneuver around your part, the second option is to use the fixed vertical blast nozzle that is directed from the ceiling of cabinet and is activated by the electrical foot control.

When it's time to put new blast media in or maybe you need to just swap it out for a different grade type, you just place a container underneath the center of the cabinet flick the latch to open the hatch door & drop out the used media, close hatch door and reload in the new media from the top, job done blast away.

Features

- Pressure valve control with gauge
- LED control panel
- 2 doors for easy access
- Stands approx. 1.65 metres high
- Door safety interlocks
- Powder coated steel construction
- Built in 240V vacuum and filter system at rear of sandblast cabinet
- Internal LED lighting system
- Complete tempered glass screen with replacement shields, gloves, gun & ceramic tips

- Recommended to use 3 x 25kg abrasive grit
