

Product Brochure For T972

Cyanoacrylate Adhesive - 8480-20

20 grams

Toughened Ethyl - High Strength Black

ORDER CODE:	T972
MODEL:	8480
Type:	Cyanoacrylate Adhesive & Toughened Ethyl & High Strength Black
Cure Time:	Fixture: 12 sec & Full Cure: 24 Hours
Viscosity (cps):	300
Gap Fill:	0.3mm
Specific Gravity:	~
Temperature Range:	~
Size:	20 grams

Description

8480

Toughened Ethyl - High Strength Black
 Cyanoacrylate Adhesive

Industrial parts manufacturing with an exceptional toughness. It resists extreme impact loading and has ten (10) times the toughness of conventional instant adhesives. Withstands high vibration and thermal cycling (-60°C to +105°C) and humidity. Ideal for applications requiring extreme environmental resistance.

Colour: Black

Chemtools 8480 is medium viscosity combined with fast cure speed, and excellent resistance to peel and shock loads. It is specially formulated to bond various Rubbers, Metals and Plastics for use in difficult environments.

APPLICATIONS:

Ideal for bonding Rubbers, Magnets, Metals and Plastics.

Ideal for Speaker Assemblies, Automotive Parts, Electronic Components, Electrical Parts, Computer Assemblies, Disk Drives, etc.
