Description

The ARC TORCHOLOGY® T2 TIG Torch has been designed for maximum performance and longer consumable lifecycles. Thanks to exclusive torch technologies, this torch boasts a 30% better power to weight ratio compared to standard UNIMIG torches – more power in a lightweight body!
FORCE COOL™ TECHNOLOGY:
A highly effective series of passages and wells force cool the collet, maximising conductivity and extending consumable life.

HEAT ZONE ISOLATION™ TECHNOLOGY:
Transferred heat from the ceramic cup is isolated by a unique external barrier resulting in cooler running torches with increased power to weight performance ratios.

TUNGSTEN RELEASE SYSTEM™:
Trouble free extension of the electrode with a 180° twist of the back cap. There is no need to remove any other wear parts to extend the electrode.
