Description

The Uni-Mig210 is an inverter-based portable Mig welding machine with added MMA and Tig function. The Mig function allows you to weld with both Gas Shielded and Gasless wire.

Easy stepless adjustment of voltage and wire feed make for easy setting of welding parameters giving excellent, professional welding results. Wire inch gives easy feeding of the wire during set up without gas wastage. Added MMA welding capability delivers easy electrode welding with high quality results, including cast iron, stainless and low hydrogen.

Connection of the 17V Tig torch provides quality DC Tig (Lift Arc ignition) welding of steel, stainless steel and copper. A semi-industrial machine, it is lightweight and portable, an optional trolley with tool trays and cylinder rack provides off the floor operation and better manoeuvrability around the workshop.

Being 240V single phase gives great portability, it can be run from any 15 Amp power socket providing more flexible use for site and home workshop locations.

Ideal for general engineers, maintenance workshop, rural workshop, panel beaters, home workshop. Designed and built to our specification. Certified to - AS/NZ60974.1 2006 Latest IGBT inverter technology
