Welding Electrodes - Stainless Steel - EI-316L

(Ø2.5 x 300mm x Qty 10) & (Ø3.25 x 300mm x Qty 5)

ORDER CODE:	W212
MODEL:	EI-316L
Type:	Stainless Steel
Size & Quantity Supplied:	Ø2.5 x 300mm x 10 & Ø3.25 x 300mm x 5

 magmaweld

Description

Electrode for welding austenitic stainless Cr-Ni-Mo steels or cast steels, having an extra low carbon content. For operating temperatures of up to +400°C. Especially suitable for welding of stainless steel chemical tanks and pipes in chemical, textile, paint, paper industries. Possible to use equally well both with AC and DC. Easy arc striking and restriking. Fine metal droplet transfer, good fusion of joint faces, finely rippled bead surface, easily removable slag.

Features

- Covered electrode for welding stainless and heat resisting steels rutile covering
