350mm Long Electrodes

5kg Pack

ORDER CODE:	W218
MODEL:	ESB 44
Type:	Multi Purpose
Size & Quantity Supplied:	Ø2.5mm x 5kg Pack

 magmaWeld

Description

Multi-purpose electrode suitable for structural steelwork, workshop and maintenance welding. Smooth and clean welds, blending into base metal without undercuts. Excellent gap bridging properties. The double covering of this electrode produces a stable, concentrated and directed arc, thus being ideally suited for root pass and positional welding. Welds are of X-ray quality.
