Description

The ARC TORCHOLOGY TIG consumable range is now complete, featuring both ceramic and quartz cups. The Standard Series covers cup sizes 4 to 10, perfect for your everyday TIG welding. Our all-new SUPER Series features larger 12, 14 and 18 cup sizes for maximum gas coverage.
Get unmatched visibility with our quartz cups. Sick of not being able to see what you're doing through your ceramic cup? Swap to a quartz! Made with specially tempered glass, they're extra heat resistant, and they're see-through. On top of great weld visibility, our quartz cups are designed to be used with our gas lens, so the shrouds are wider, giving you greater gas coverage.
Gas Lens Collet Bodies come with a diffuser and a mesh screen, so they're wider, but they distribute gas more evenly and with less turbulence over the weld. You can have the tungsten stick out further, giving you better manoeuvrability and visibility of the weld pool. They're perfect for welding inside corners or in tight spaces.
